ABOUT ME

I'm Batuhan Turgut. I got interested in programming in high school. with Java

I continued on this path that I started by dealing with Java and Cyber Security for 4 years. I started exploring other technologies besides just using Java. In this process, I developed projects on many languages at the beginner-intermediate level. I am experienced in OOP, MVC AND REST api architecture. I was interested in the future and flexibility of JavaScript and I discovered Node.js, React Native, Vue, Angular technologies. The package structure of React Native caught my attention and I saw that it provides Cross Platform Development. I have been developing freelance sites for over a year using React/Node.js, React/Spring, React/Django.

WORK EXPERIENCE

10/06/2020 – 20/06/2020 – İzmir, Turkey

Freelance Developer

Data Scraping with Selenium

Data gathering on Exchange platforms

01/08/2020 – 08/08/2020 – Selçuklu, Turkey
